

Los Rios Transportation Connections Plan

Acknowledgements

WALKS Sacramento is pleased to have partnered with the County of Sacramento Department of Transportation and the Los Rios Community College District in developing the Los Rios Transportation Connections Plan. The project, sponsored by the Sacramento County Department of Transportation under direction of Tom Zlotkowski with the assistance of Dave Franke and Michael Penrose, was funded with a California Department of Transportation Community Planning Grant. Caltrans staff support came initially from Alyssa Begley and then subsequently included Kirk Schneider and Gabriel Corley.

Leadership from the Los Rios Community College District began with Chancellor Brice Harris' support of the project. Its early direction was supported by Jan Sweeney and Gordon Poon, both now retired. Vice Chancellor Bill Karns and his assistant Debi Pierce played an ongoing collaborative role in directing the project along with Rosemary Montijo and Victoria Rosario. Kim Sayles and Ena Llagen provided important administrative and financial support. Technical support from Susie Williams and Betty Glycer-Culver was very helpful as was assistance from Raquel Arata and Barbara Hamlett.

We received the involvement of many individuals at the four colleges and would particularly like to thank President David Viar, Laduan Smedley, Preston Harris, Jim Barr and Charlie Thomsen of American River College; President Francisco Rodriguez of Cosumnes College and his staff Donald Wallace and Cory Wathen; President Thelma Scott-Skillman and Kathleen Kirklin of Folsom Lake College; and Vice President Robert Martinelli and Greg Hayman of Sacramento City College.

The faculty and staff who were selected to receive stipends for their involvement in this project and who each contributed the research that provided input to the Plan include John Bell, American River College; Scott Crosier and Andrea Roberge, Cosumnes River College; Tim McHargue, Steven Holzberg and Chris Olson, Folsom Lake College; and Gayle Pitman, Sacramento City College.

Ron Vicari of the Sacramento County's Department of Transportation directed the County's involvement in this project and chaired the project's "Resource Advisory Committee" during the preparation of the Plan. The Resource Advisory Committee met several times during the course of the development of the plan and the number of individuals who participated in the Committee or provided critical input to the plan was considerable.

Outreach meetings were held at each of the campuses and numerous presentations were made to campus and community groups. We acknowledge the time and input of the individuals who participated in these meetings and provided valuable input. Out of concerns for individuals privacy we have not included a full listing of the many who attended these meetings.

Numerous individuals and organizations have made small and large contributions to the success of the project. In addition to individuals already mentioned, the following people contributed to the support of this project and helped make the plan a reality.

American River College

Russ Walker	California Department of Transportation
Diane Woodruff	California Community Colleges

We were fortunate to have technical advice provided by national walkability expert Dan Burden and urban designer David Evans. Walt Seifert, of Sacramento Area Bicycle Advocates (SABA) provided bicycle facilities expertise.

Volunteers, as well, supported this effort including Ron and Noelle Anderson of WALKSacramento and Owen Howlett, Mike McCann, Charles McCann and Tony Powers of Folsom Area Bicycle Advocates and SABA.

WALKSacramento staff involved in this project included Anne Geraghty, Lindell Price, Chris Holm and Terry Preston. Former staff that contributed included Anna Marie Young, Scott Clark, Pam Terry and Tom Vu.

We again thank the many participants and look forward to continued collaboration as the recommendations of this plan are brought to fruition.
