RE: Hampton Inn & Suites (DR12-257)

Dear Mr. Ablog:

WALKSacramento has reviewed the Hampton Inn & Suites Project on 5.67 acres north of Highway 50 and south of the University/65th Street light rail station.

After reviewing the project plans, we offer the following recommendations:

**Place windows and other enhancements in all stairwells.**

Stairs are associated with light to moderate physical activity and provide visitors a more active alternative to elevators. Again, integrating physical activity throughout one’s day is vital to improving public health outcomes. By including windows in stairwells at various levels, stair use is made safer and more aesthetically pleasing via natural light illumination. Further, creating environments similar to elevators and hallways by using carpeted floors, wall coverings, signage, and handrails make stairwells more of an attractive use within a building.

**Include windows on the east and west ends of hallways.**

Windows that naturally illuminate hallways provide visitors with views of the local environment, attract visitors to stairwells, create “eyes-on-the-street,” and may even serve to reduce electricity costs. Not only is passive view of outdoor spaces (particularly green spaces) vital to one’s health and wellbeing, but windows may attract visitors to the stairwells located at the east and west ends of the building. Further, more viewpoints from within a building increases the amount of surveillance of parking lots and local streets, making for a safer space.

**Include pedestrian oriented lighting between the transit station and hotel.**

WALKSacramento commends the applicant for providing a comfortable pedestrian connection to the University/65th Street light rail station. Pedestrian scaled lighting along this route would serve to improve safety and further encourage active transportation and transit use.
WALKSacramento also applauds the applicant for exceeding the zoning code requirement for both temporary and permanent bicycle parking spaces. The twelve total spaces will support both employees and visitors who chose to incorporate active transportation into their commutes.

WALKSacramento is working to support increased physical activity such as walking and bicycling in local neighborhoods as well as helping to create community environments that support walking and bicycling. The benefits include improved physical fitness, less motor vehicle traffic congestion, better air quality, and a stronger sense of cohesion and safety in local neighborhoods.

Thank you for your consideration of these comments and recommendations. If you have questions or need additional information, please contact me at (916) 446-9255 or kkumar@walksacramento.org

Sincerely,

Kirin Kumar
Project Assistant
WALKSacramento

Enclosure: Development Checklist for Biking and Walking
This checklist is provided to give an indication of design, engineering, and policy elements that we consider when reviewing development projects.

POLICIES
- Walking and biking is a priority
- Adopted a policy to develop a full multi-modal and ADA accessible transportation system

Project Review and Comment

POLICY CONSIDERATIONS
- Pedestrian Master Plan
- Bicycle Master Plan
- Regional Blueprint
- Regional Blueprint Consistent General Plans
- Adopted Climate Action Plans
- Subdivision ordinances to support pedestrian and bicycle access and safety
- Zoning ordinance to support pedestrian and bicycle access and safety

ENGINEERING
- SIDEWALKS & BIKE LANES ON BOTH SIDES OF MAJOR ROADWAYS
  - Pedestrian Level of Service “C” or better on arterials
  - Bicycle Level of Service “C” or better on arterials
- SAFE CROSSINGS FOR PEDESTRIANS
  - every 300-600 feet on major arterials
  - well lit, marked crosswalks
  - audible signals & count-down signals
  - median refuge islands
- SPEED MANAGEMENT
  - Speed limits based on safety of pedestrians and bicyclists
  - Implement “road diets” where there is excess lane capacity
- STREET DESIGN STANDARDS
  - Maximize pedestrian and bicyclist safety
  - Sidewalks buffered by trees and landscaping on major arterials
  - Vertical curbs
  - 5’ minimum sidewalk widths, 8’ in front of schools
  - 6’ minimum bike lanes on busy streets
INTERSECTIONS
- Median refuge islands for pedestrians
- Signal timing to enable safe passage
- Signal detection for bicyclists
- Crossings on all 4 legs of intersections

ELIMINATE BARRIERS
- Freeway, railroad, river and creek crossings
- Obstructions in sidewalks and bike lanes

NEW DEVELOPMENT – REQUIRE
- Walking & bicycling circulation plans for all new development
- Direct and convenient connections to activity centers, including schools, stores, parks, transit
- Mixed uses and other transit supporting uses within ¼ mile of light rail stations or bus stops with frequent service
- Minimum width streets
- Maximum block length of 400’
- 4-lane maximum for arterials; Recommend 2 lanes wherever possible

NEW DEVELOPMENT – DISCOURAGE
- Cul-de-sacs (unless it includes bike/ped connections)
- Gated and/or walled communities
- Meandering sidewalks
- Inappropriate uses near transit (gas stations, drive-thru restaurants, mini storage and other auto dependent uses)

BUILDINGS – REQUIRE
- Direct access for pedestrians from the street
- Attractive and convenient stairways
- Bicycle parking – long & short term
- Shower & clothing lockers

OLDER NEIGHBORHOODS
- Improve street crossings
- Reduce speeds
- Provide new connections
- Create short cuts for walkers and bicyclists by purchase of properties or other means
- Provide sidewalks on both sides of major streets
Policy Review and Comment

ENFORCEMENT & MAINTENANCE
- Enforce speed limits
- Enforce crosswalk rules – conduct crosswalk sting operations
- Enforce restrictions against parking on sidewalks
- Enforce bicycle rules including riding with traffic, lights at night, stopping at red lights
- Implement CVC 267 setting speed limits based on pedestrian and bicyclist safety
- Sweep streets and fix hazards
- Repair and replace broken sidewalks

EDUCATION
- Train staff on pedestrian and bicycle facility design.
- Train development community about pedestrian and bicycle planning and safety issues
- Bicycle skills training

FUNDING
- Include pedestrian and bicycle facilities in capital improvement programs
- Include pedestrian and bicycle facilities as a part of roadway widening and improvement projects
- Support Measure A pedestrian and bicycle facility allocation
- Set priorities based on safety and latent demand
- SACOG Community Design grants & Bike/Ped grants
- California Bicycle transportation Account
- Safe Routes to School
