

# POWER INN ALLIANCE ALTERNATIVE MODE USE STUDY

Together, WALKSacramento, Sacramento Area Bicycle Advocates, and Power Inn Alliance are working to identify short, medium, and longer term solutions that would improve walking, biking, and transit access to the Power Inn Area. The solutions will be gathered through a comprehensive outreach process and a series of walking and biking.

The Study addresses the following goals identified by the Power Inn Alliance:

- Enhancing safety for pedestrians and people on bikes
- Improving access to and from transit areas along Folsom Boulevard
- Improving access to and from adjacent neighborhoods to the West
- Creating low-stress commercial district streets that support local business and other PIA efforts
- Create commercial nodes, placemaking
- Identify program improvements such as shuttle service to supplement efforts to increase access

If you are interested in this project and joining us on our upcoming walk/bike assessment of the area, please sign-up or contact us with any questions!
