RE: Ventris Place (P17-041)

Dear Ms. Lim:

WALKSacramento has reviewed the project routing for Ventris Place (P17-041). The project proposes 38 single-family alley-loaded houses on about 5.15 acres at 6441 and 6448 Jacinto Avenue, and amending the General Plan designation from Suburban Neighborhood Low Density to Suburban Neighborhood Medium Density.

Ventris Place has several features that will support pedestrian travel and public health. The project site is directly across Jacinto Avenue from North Laguna Creek Park, and park distance is related to park use and physical activity. Alley-loaded houses eliminates conflicts at each residential driveway which makes it safer for people to walk and children to play in front yards. Ventris Place proposes to use pervious hardscape for streets and common driveways which can help maintain tree health and reduce local temperatures compared to asphalt. Trees in front of and in back of each house provides a greener setting and a lower-temperature environment that makes walking more enjoyable.

We’d like to offer some recommendations to ensure access to the houses on lots 25, 26 and 31-38 for people of all mobility levels. The issue is whether the sidewalk from the front of each house will have a uninterrupted and level surface between the house and the 10′-wide paver surface that provides access to other houses and the Starburst Way sidewalk. **The front walk needs to go through the grass pavers, and the valley gutter should have a shallow enough depth, so that tripping or falling hazards aren’t created.**

WALKSacramento is working to support increased physical activity such as walking and bicycling in local neighborhoods as well as helping to create community environments that support walking and bicycling. The benefits include improved physical fitness, less motor vehicle traffic congestion, better air quality, and a stronger sense of cohesion and safety in local neighborhoods.

If you have questions or need additional information, please contact me.

Sincerely,

Chris Holm
Project Manager

Attachment: Development Checklist for Biking and Walking
DEVELOPMENT CHECKLIST for BIKING and WALKING
Prepared by WALKSacramento and SABA (Sacramento Area Bicycle Advocates)
September 2012

This checklist is provided to give an indication of design, engineering, and policy elements that we consider when reviewing development projects.

POLICIES
- Walking and biking is a priority
- Adopted a policy to develop a full multi-modal and ADA accessible transportation system

Project Review and Comment

POLICY CONSIDERATIONS
- Pedestrian Master Plan
- Bicycle Master Plan
- Regional Blueprint
- Regional Blueprint Consistent General Plans
- Adopted Climate Action Plans
- Subdivision ordinances to support pedestrian and bicycle access and safety
- Zoning ordinance to support pedestrian and bicycle access and safety

ENGINEERING
- SIDEWALKS & BIKE LANES ON BOTH SIDES OF MAJOR ROADWAYS
  - Pedestrian Level of Service “C” or better on arterials
  - Bicycle Level of Service “C” or better on arterials
- SAFE CROSSINGS FOR PEDESTRIANS
  - every 300-600 feet on major arterials
  - well lit, marked crosswalks
  - audible signals & count-down signals
  - median refuge islands
- SPEED MANAGEMENT
  - Speed limits based on safety of pedestrians and bicyclists
  - Implement “road diets” where there is excess lane capacity
- STREET DESIGN STANDARDS
  - Maximize pedestrian and bicyclist safety
  - Sidewalks buffered by trees and landscaping on major arterials
  - Vertical curbs
  - 5’ minimum sidewalk widths, 8’ in front of schools
  - 6’ minimum bike lanes on busy streets
INTERSECTIONS
  o Median refuge islands for pedestrians
  o Signal timing to enable safe passage
  o Signal detection for bicyclists
  o Crossings on all 4 legs of intersections

ELIMINATE BARRIERS
  o Freeway, railroad, river and creek crossings
  o Obstructions in sidewalks and bike lanes

NEW DEVELOPMENT – REQUIRE
  q Walking & bicycling circulation plans for all new development
  q Direct and convenient connections to activity centers, including schools, stores, parks, transit
  q Mixed uses and other transit supporting uses within ¼ mile of light rail stations or bus stops with frequent service
  q Minimum width streets
  q Maximum block length of 400’
  q 4-lane maximum for arterials; Recommend 2 lanes wherever possible

NEW DEVELOPMENT – DISCOURAGE
  q Cul-de-sacs (unless it includes bike/ped connections)
  q Gated and/or walled communities
  q Meandering sidewalks
  q Inappropriate uses near transit (gas stations, drive-thru restaurants, mini storage and other auto dependent uses)

BUILDINGS – REQUIRE
  q Direct access for pedestrians from the street
  q Attractive and convenient stairways
  q Bicycle parking – long & short term
  q Shower & clothing lockers

OLDER NEIGHBORHOODS
  q Improve street crossings
  q Reduce speeds
  q Provide new connections
  q Create short cuts for walkers and bicyclists by purchase of properties or other means
  q Provide sidewalks on both sides of major streets
Policy Review and Comment

ENFORCEMENT & MAINTENANCE
- Enforce speed limits
- Enforce crosswalk rules – conduct crosswalk sting operations
- Enforce restrictions against parking on sidewalks
- Enforce bicycle rules including riding with traffic, lights at night, stopping at red lights
- Implement CVC 267 setting speed limits based on pedestrian and bicyclist safety
- Sweep streets and fix hazards
- Repair and replace broken sidewalks

EDUCATION
- Train staff on pedestrian and bicycle facility design.
- Train development community about pedestrian and bicycle planning and safety issues
- Bicycle skills training

FUNDING
- Include pedestrian and bicycle facilities in capital improvement programs
- Include pedestrian and bicycle facilities as a part of roadway widening and improvement projects
- Support Measure A pedestrian and bicycle facility allocation
- Set priorities based on safety and latent demand
- SACOG Community Design grants & Bike/Ped grants
- California Bicycle transportation Account
- Safe Routes to School
