RE: Metro Air Park Hotels (PLNP2018-00034)

Dear Ms. Holsworth:

WALKSacramento has reviewed Metro Air Park Hotels (PLNP2018-00034) and we offer the following comments.

We are pleased to see there are plans to provide a path of travel between the public sidewalk and each of the four hotels. However, the path of travel on the Candlewood Suites site is incomplete. It appears the path of travel from the entry vestibule goes into the driveway and up a curb to the sidewalk at the building edge. There's a path of travel to a door at the rear of the building, but the rear door may not provide 24-hour access that will be available at the entry vestibule.

WALKSacramento is working to support increased physical activity such as walking and bicycling in local neighborhoods as well as helping to create community environments that support walking and bicycling. The benefits include improved physical fitness, less motor vehicle traffic congestion, better air quality, and a stronger sense of cohesion and safety in local neighborhoods.

Sincerely,

Chris Holm
Project Manager
