**RE: Natomas Park Drive Apartments (P15-003)**

Dear Mr. Hung:

WALKSacramento has reviewed the proposed Natomas Park Drive Apartments. The following comments are based on the March 27, 2015 project routing.

Development projects that lead to more walking and active travel are critical to our community's future. Human beings need moderate exercise, such as walking, for about 30 minutes a day in order to prevent the development of chronic disease and overweight. It is important to evaluate a project's potential to promote walking and active travel both within the site and its connectivity to the surrounding built environment.

The Natomas Park Drive Apartments project proposes 251-unit garden style apartments located on approximately 11 acres. The project includes an adequate network of pedestrian walkways to connect buildings and open space within the site. The project's location is accessible to nearby employment centers, neighborhood services, and transportation options. It is located adjacent to Sacramento Regional Transit bus terminals and has easy access to the American River Bike Trail and Discovery Park.

WALKSacramento sees value in this project for the proposed change from office space to residential, improving the mix of land uses. The potential for walking by future residents is very good, considering the proximity to desirable locations. In addition to using active transportation as a mode of commuting to employment centers and commercial locations, the project is located adjacent to Discovery Park. Sacramento's gem, Discovery Park is a prime location for recreational walking and biking. This will encourage healthy lifestyles and increased public health outcomes.

The proposed project depicts several easements proposed for abandonment. The City of Sacramento has an excellent greenway trail which dead-ends at the proposed project. Developing the allotted easements for bicyclists and pedestrians may improve the safety of users and the likelihood they will use active transportation. **WALKSacramento recommends maintaining the existing easements to provide for future pedestrian and bicycle travel.**

WALKSacramento is working to support increased physical activity such as walking and bicycling in local neighborhoods as well as helping to create community environments that support walking and bicycling. The benefits include improved physical fitness, less motor vehicle traffic congestion, better air quality, and a stronger sense of cohesion and safety in local neighborhoods.

Thank you for your consideration of these comments and recommendations. If you have questions or need additional information, please contact me at (916) 446-9255 or [egerhart@walksacramento.org](mailto:egerhart@walksacramento.org).

Respectfully,

Emily Alice Gerhart

Project Coordinator

Enclosure: Development Checklist for Biking and Walking

## ***DEVELOPMENT CHECKLIST for BIKING and WALKING***

*Prepared by WALKSacramento and SABA (Sacramento Area Bicycle Advocates)*

*September 2012*

This checklist is provided to give an indication of design, engineering, and policy elements that we consider when reviewing development projects.

### **POLICIES**

- Walking and biking is a priority
- Adopted a policy to develop a full multi-modal and ADA accessible transportation system

## ***Project Review and Comment***

### **POLICY CONSIDERATIONS**

- Pedestrian Master Plan
- Bicycle Master Plan
- Regional Blueprint
- Regional Blueprint Consistent General Plans
- Adopted Climate Action Plans
- Subdivision ordinances to support pedestrian and bicycle access and safety
- Zoning ordinance to support pedestrian and bicycle access and safety

### **ENGINEERING**

- SIDEWALKS & BIKELANES ON BOTH SIDES OF MAJOR ROADWAYS**
  - Pedestrian Level of Service "C" or better on arterials
  - Bicycle Level of Service "C" or better on arterials
- SAFE CROSSINGS FOR PEDESTRIANS**
  - every 300-600 feet on major arterials
  - well lit, marked crosswalks
  - audible signals & count-down signals
  - median refuge islands
- SPEED MANAGEMENT**
  - Speed limits based on safety of pedestrians and bicyclists
  - Implement "road diets" where there is excess lane capacity
- STREET DESIGN STANDARDS**
  - Maximize pedestrian and bicyclist safety
  - Sidewalks buffered by trees and landscaping on major arterials
  - Vertical curbs
  - 5' minimum sidewalk widths, 8' in front of schools
  - 6' minimum bike lanes on busy streets

- ❑ **INTERSECTIONS**
  - Median refuge islands for pedestrians
  - Signal timing to enable safe passage
  - Signal detection for bicyclists
  - Crossings on all 4 legs of intersections
  
- ❑ **ELIMINATE BARRIERS**
  - Freeway, railroad, river and creek crossings
  - Obstructions in sidewalks and bike lanes

**NEW DEVELOPMENT – REQUIRE**

- ❑ Walking & bicycling circulation plans for all new development
- ❑ Direct and convenient connections to activity centers, including schools, stores, parks, transit
- ❑ Mixed uses and other transit supporting uses within ¼ mile of light rail stations or bus stops with frequent service
- ❑ Minimum width streets
- ❑ Maximum block length of 400'
- ❑ 4-lane maximum for arterials; Recommend 2 lanes wherever possible

**NEW DEVELOPMENT – DISCOURAGE**

- ❑ Cul-de-sacs (unless it includes bike/ped connections)
- ❑ Gated and/or walled communities
- ❑ Meandering sidewalks
- ❑ Inappropriate uses near transit (gas stations, drive-thru restaurants, mini storage and other auto dependent uses)

**BUILDINGS – REQUIRE**

- ❑ Direct access for pedestrians from the street
- ❑ Attractive and convenient stairways
- ❑ Bicycle parking – long & short term
- ❑ Shower & clothing lockers

**OLDER NEIGHBORHOODS**

- ❑ Improve street crossings
- ❑ Reduce speeds
- ❑ Provide new connections
- ❑ Create short cuts for walkers and bicyclists by purchase of properties or other means
- ❑ Provide sidewalks on both sides of major streets

## *Policy Review and Comment*

### **ENFORCEMENT & MAINTENANCE**

- ❑ Enforce speed limits
- ❑ Enforce crosswalk rules – conduct crosswalk sting operations
- ❑ Enforce restrictions against parking on sidewalks
- ❑ Enforce bicycle rules including riding with traffic, lights at night, stopping at red lights
- ❑ Implement CVC 267 setting speed limits based on pedestrian and bicyclist safety
- ❑ Sweep streets and fix hazards
- ❑ Repair and replace broken sidewalks

### **EDUCATION**

- ❑ Train staff on pedestrian and bicycle facility design.
- ❑ Train development community about pedestrian and bicycle planning and safety issues
- ❑ Bicycle skills training

### **FUNDING**

- ❑ Include pedestrian and bicycle facilities in capital improvement programs
- ❑ Include pedestrian and bicycle facilities as a part of roadway widening and improvement projects
- ❑ Support Measure A pedestrian and bicycle facility allocation
- ❑ Set priorities based on safety and latent demand
- ❑ SACOG Community Design grants & Bike/Ped grants
- ❑ California Bicycle transportation Account
- ❑ Safe Routes to School
