David Hung Planning Department City of Sacramento 300 Richards Boulevard Sacramento, CA 95811

RE: Sactown Union Brewery (Z14-044)

Dear Mr. Hung:

Thank you for forwarding to WALKSacramento the project information for the Sactown Union Brewery project at the corner of 66th Street and Elvas Avenue. After reviewing the site plan and drawings we offer the following comments:

Due to the project's close proximity to Sacramento State and nearby residential units, it may be that patrons feel inclined to walk or bike to the brewery and tasting room. The planned visitor entrance to the building would require pedestrians and cyclists to enter through a relatively narrow alleyway, sharing the right of way with vehicles. Further, without pedestrian oriented lighting and precautions made to eliminate potential hiding places, alleys can pose a threat to pedestrians. We recommend siting the tasting room entrance on 66th Avenue to adequately support comfortable pedestrian access.

Further, in the project's site plan, there is no clear indication of the placement of bicycle parking. Again, to best support active transportation, siting bicycle amenities to avoid conflicts with vehicles and pedestrians is paramount.

WALKSacramento is working to support increased physical activity such as walking and bicycling in local neighborhoods as well as helping to create community environments that support walking and bicycling. The benefits include improved physical fitness, less motor vehicle traffic congestion, better air quality, and a stronger sense of cohesion and safety in local neighborhoods.

Thank you for your consideration of these comments and recommendations. If you have questions or need additional information, please contact me at (916) 446-9255 or kkumar@walksacramento.org.

Sincerely,

Kirin Kumar Project Assistant WALKSacramento Enclosure: Development Checklist for Biking and Walk

DEVELOPMENT CHECKLIST for BIKING and WALKING

Prepared by WALKSacramento and SABA (Sacramento Area Bicycle Advocates)
September 2012

This checklist is provided to give an indication of design, engineering, and policy elements that we consider when reviewing development projects.

POLICIES

- Walking and biking is a priority
- Adopted a policy to develop a full multi-modal and ADA accessible transportation system

Project Review and Comment

POLICY CONSIDERATIONS

- Pedestrian Master Plan
- Bicycle Master Plan
- Regional Blueprint
- Regional Blueprint Consistent General Plans
- Adopted Climate Action Plans
- Subdivision ordinances to support pedestrian and bicycle access and safety
- Zoning ordinance to support pedestrian and bicycle access and safety

ENGINEERING

- □ SIDEWALKS & BIKELANES ON BOTH SIDES OF MAJOR ROADWAYS
 - o Pedestrian Level of Service "C" or better on arterials
 - o Bicycle Level of Service "C" or better on arterials
- SAFE CROSSINGS FOR PEDESTRIANS
 - every 300-600 feet on major arterials
 - o well lit, marked crosswalks
 - o audible signals & count-down signals
 - o median refuge islands
- SPEED MANAGEMENT
 - Speed limits based on safety of pedestrians and bicyclists
 - o Implement "road diets" where there is excess lane capacity
- STREET DESIGN STANDARDS
 - Maximize pedestrian and bicyclist safety
 - Sidewalks buffered by trees and landscaping on major arterials
 - Vertical curbs
 - o 5' minimum sidewalk widths, 8' in front of schools
 - o 6' minimum bike lanes on busy streets

INTERSECTIONS

- Median refuge islands for pedestrians
- Signal timing to enable safe passage
- Signal detection for bicyclists
- Crossings on all 4 legs of intersections

ELIMINATE BARRIERS

- Freeway, railroad, river and creek crossings
- Obstructions in sidewalks and bike lanes

NEW DEVELOPMENT - REQUIRE

- Walking & bicycling circulation plans for all new development
- Direct and convenient connections to activity centers, including schools, stores, parks, transit
- Mixed uses and other transit supporting uses within ¼ mile of light rail stations or bus stops with frequent service
- Minimum width streets
- Maximum block length of 400'
- □ 4-lane maximum for arterials; Recommend 2 lanes wherever possible

NEW DEVELOPMENT – DISCOURAGE

- Cul-de-sacs (unless it includes bike/ped connections)
- Gated and/or walled communities
- Meandering sidewalks
- Inappropriate uses near transit (gas stations, drive-thru restaurants, mini storage and other auto dependent uses)

BUILDINGS - REQUIRE

- Direct access for pedestrians from the street
- Attractive and convenient stairways
- □ Bicycle parking long & short term
- Shower & clothing lockers

OLDER NEIGHBORHOODS

- Improve street crossings
- Reduce speeds
- Provide new connections
- Create short cuts for walkers and bicyclists by purchase of properties or other means
- Provide sidewalks on both sides of major streets

Policy Review and Comment

ENFORCEMENT & MAINTENANCE

- □ Enforce speed limits
- □ Enforce crosswalk rules conduct crosswalk sting operations
- Enforce restrictions against parking on sidewalks
- Enforce bicycle rules including riding with traffic, lights at night, stopping at red lights
- Implement CVC 267 setting speed limits based on pedestrian and bicyclist safety
- Sweep streets and fix hazards
- Repair and replace broken sidewalks

EDUCATION

- □ Train staff on pedestrian and bicycle facility design.
- Train development community about pedestrian and bicycle planning and safety issues
- Bicycle skills training

FUNDING

- Include pedestrian and bicycle facilities in capital improvement programs
- Include pedestrian and bicycle facilities as a part of roadway widening and improvement projects
- Support Measure A pedestrian and bicycle facility allocation
- Set priorities based on safety and latent demand
- SACOG Community Design grants & Bike/Ped grants
- California Bicycle transportation Account
- Safe Routes to School
