**RE: Sacramento Waterfront Museum (P12-042)**

Dear Mr. Compton:

WALKSacramento has reviewed project routing for the Sacramento Waterfront Museum project. Thank you for the opportunity to provide the following comments.

Development projects that lead to more walking and active travel are critical to our community's future. Human beings need moderate exercise, such as walking, for about 30 minutes a day in order to prevent the development of chronic disease and overweight. Only 38% of the population in the Sacramento region is active at this minimal level, often due to limitations placed by a built environment not suited to walking and other types of physically active travel. A 30-minute walk is about one and a half miles. If more people could obtain regular exercise by walking and bicycling to their regular destinations, in lieu of driving, it could yield significant health improvements to the resident population of this area. Reduced driving would also decrease vehicle emissions and the prevalence of asthma, cardiovascular disease, and other air pollution-related conditions. More trips by walking and bicycling could help reduce the current expensive burden on the health care system of providing medical care to more and more people with chronic conditions due to inactivity and poor air quality.

The project proposal, which includes replacement of office and residential high rise with a museum and elimination of Road V, is a significant deviation from the approved Sacramento Docks Specific Plan. The major impact resulting from the proposed changes and plans will be reduced pedestrian and bicycle access of the Sacramento riverfront and the future Docks Park, and inadequate access of the proposed museum.

We are glad to see that 8-foot sidewalks and 8-foot planters will be constructed on Front Street. This will contribute to a walkable route from Broadway to the museum. However, at this time there is a 300-foot segment of Front Street between Broadway and the Pioneer Bridge without sidewalks on either side, and the east side under the bridge has no sidewalks.

Access to the museum from the Sacramento River Parkway Trail has not been provided in the proposed project plan. The Docks Specific Plan provided for three east-west

pedestrian connections (extensions of U Street, V Street, and W Street) within the area of the proposed museum project. The museum project plans show the south half of the U Street extension as parking and a row of trees; V Street is proposed to be eliminated; and the location of the W Street extension, which is not indicated on the plans, is shown as CalPERS parking.

WALKSacramento recommends the following to provide for future pedestrian access to the Sacramento Waterfront Museum and the Sacramento River Parkway Trail: **The project should include pedestrian walkways constructed at the north and south ends of the project between Front Street and parcels to the west.**

WALKSacramento is working to support increased physical activity such as walking and bicycling in local neighborhoods as well as helping to create community environments that support walking and bicycling. The benefits include improved physical fitness, less motor vehicle traffic congestion, better air quality, and a stronger sense of cohesion and safety in local neighborhoods.

Thank you for your consideration of these comments and recommendations. If you have questions or need additional information, please contact me at (916) 446-9255 or [cholm@walksacramento.org](mailto:cholm@walksacramento.org).

Sincerely,

Chris Holm  
Project Analyst

Enclosure: Development Checklist for Biking and Walking

## **DEVELOPMENT CHECKLIST for BIKING and WALKING**

*Prepared by WALKSacramento and SABA (Sacramento Area Bicycle Advocates)*

*September 2012*

This checklist is provided to give an indication of design, engineering, and policy elements that we consider when reviewing development projects.

### **POLICIES**

- Walking and biking is a priority
- Adopted a policy to develop a full multi-modal and ADA accessible transportation system

## *Project Review and Comment*

### **POLICY CONSIDERATIONS**

- Pedestrian Master Plan
- Bicycle Master Plan
- Regional Blueprint
- Regional Blueprint Consistent General Plans
- Adopted Climate Action Plans
- Subdivision ordinances to support pedestrian and bicycle access and safety
- Zoning ordinance to support pedestrian and bicycle access and safety

### **ENGINEERING**

- SIDEWALKS & BIKELANES ON BOTH SIDES OF MAJOR ROADWAYS
  - Pedestrian Level of Service "C" or better on arterials
  - Bicycle Level of Service "C" or better on arterials
- SAFE CROSSINGS FOR PEDESTRIANS
  - every 300-600 feet on major arterials
  - well lit, marked crosswalks
  - audible signals & count-down signals
  - median refuge islands
- SPEED MANAGEMENT
  - Speed limits based on safety of pedestrians and bicyclists
  - Implement "road diets" where there is excess lane capacity
- STREET DESIGN STANDARDS
  - Maximize pedestrian and bicyclist safety
  - Sidewalks buffered by trees and landscaping on major arterials
  - Vertical curbs
  - 5' minimum sidewalk widths, 8' in front of schools
  - 6' minimum bike lanes on busy streets

- ❑ **INTERSECTIONS**
  - Median refuge islands for pedestrians
  - Signal timing to enable safe passage
  - Signal detection for bicyclists
  - Crossings on all 4 legs of intersections
  
- ❑ **ELIMINATE BARRIERS**
  - Freeway, railroad, river and creek crossings
  - Obstructions in sidewalks and bike lanes

### **NEW DEVELOPMENT – REQUIRE**

- ❑ Walking & bicycling circulation plans for all new development
- ❑ Direct and convenient connections to activity centers, including schools, stores, parks, transit
- ❑ Mixed uses and other transit supporting uses within ¼ mile of light rail stations or bus stops with frequent service
- ❑ Minimum width streets
- ❑ Maximum block length of 400'
- ❑ 4-lane maximum for arterials; Recommend 2 lanes wherever possible

### **NEW DEVELOPMENT – DISCOURAGE**

- ❑ Cul-de-sacs (unless it includes bike/ped connections)
- ❑ Gated and/or walled communities
- ❑ Meandering sidewalks
- ❑ Inappropriate uses near transit (gas stations, drive-thru restaurants, mini storage and other auto dependent uses)

### **BUILDINGS – REQUIRE**

- ❑ Direct access for pedestrians from the street
- ❑ Attractive and convenient stairways
- ❑ Bicycle parking – long & short term
- ❑ Shower & clothing lockers

### **OLDER NEIGHBORHOODS**

- ❑ Improve street crossings
- ❑ Reduce speeds
- ❑ Provide new connections
- ❑ Create short cuts for walkers and bicyclists by purchase of properties or other means
- ❑ Provide sidewalks on both sides of major streets

## *Policy Review and Comment*

### **ENFORCEMENT & MAINTENANCE**

- ❑ Enforce speed limits
- ❑ Enforce crosswalk rules – conduct crosswalk sting operations
- ❑ Enforce restrictions against parking on sidewalks
- ❑ Enforce bicycle rules including riding with traffic, lights at night, stopping at red lights
- ❑ Implement CVC 267 setting speed limits based on pedestrian and bicyclist safety
- ❑ Sweep streets and fix hazards
- ❑ Repair and replace broken sidewalks

### **EDUCATION**

- ❑ Train staff on pedestrian and bicycle facility design.
- ❑ Train development community about pedestrian and bicycle planning and safety issues
- ❑ Bicycle skills training

### **FUNDING**

- ❑ Include pedestrian and bicycle facilities in capital improvement programs
- ❑ Include pedestrian and bicycle facilities as a part of roadway widening and improvement projects
- ❑ Support Measure A pedestrian and bicycle facility allocation
- ❑ Set priorities based on safety and latent demand
- ❑ SACOG Community Design grants & Bike/Ped grants
- ❑ California Bicycle transportation Account
- ❑ Safe Routes to School
