**RE: K Street Mixed Use (PB15-055, -056)**

Dear Mr. Sites:

WALKSacramento has reviewed the K Street Mixed Use project routing and we offer the following comments.

Development projects that lead to more walking and active travel are critical to our community's future. Human beings need moderate exercise, such as walking, for about 30 minutes a day in order to prevent the development of chronic disease and overweight. Only 30% of the population in the Sacramento region is active at this minimal level, often due to limitations placed by a built environment not suited to walking and other types of physically active travel.

Future apartment residents of the K Street Mixed Use project will have opportunities for moderate daily exercise by using the stairs rather than the elevator. This is primarily due to the convenient access to stairwells from the apartment main entrance hallway and from within the parking garage. The absence of doors at the bottom of the stairwell in the main entrance hallway may further contribute to stair use because the stairs are easily accessible and can be seen as immediately ready to use – no waiting, as may be the case with the elevator.

The second and third floor units on the 24<sup>th</sup> Street side of the building have good "eyes on the street" with active living areas, e.g. the living and dining rooms that have windows and sliding glass doors facing the street. The K Street side has only bedroom and water closet windows, so "eyes on the street" isn't nearly as good as the 24<sup>th</sup> Street side. The project would be improved by placing active living areas of apartments 1 and 6 so they face the street to provide "eyes on K Street."

Shade trees in Sacramento provide clear benefits to pedestrians by reducing ambient temperature, protection from direct sun and beautifying the street. Therefore, it's unfortunate that a tree is proposed to be removed on 23<sup>rd</sup> Street to provide room for the two-way driveway. The two triangular areas shown on the site plan as "Restriped Spaces" on 24<sup>th</sup> Street adjacent to the driveway approach could provide space to construct landscape planters to replace the lost planter area. Trees in these planters

could benefit not only pedestrians, but drivers, too, by shading parked vehicles.

**WALKSacramento recommends that planters with shade trees be constructed on 24<sup>th</sup> Street adjacent to the proposed driveway. If that's infeasible, then trees of at least ornamental size should be planted in the existing planter areas on either side of the 24<sup>th</sup> Street driveway.**

WALKSacramento is working to support increased physical activity such as walking and bicycling in local neighborhoods as well as helping to create community environments that support walking and bicycling. The benefits include improved physical fitness, less motor vehicle traffic congestion, better air quality, and a stronger sense of cohesion and safety in local neighborhoods.

Thank you for your consideration of these comments and recommendations. If you have questions or need additional information, please contact me at (916) 446-9255 or [cholm@walksacramento.org](mailto:cholm@walksacramento.org).

Sincerely,

Chris Holm  
Project Manager

Attachment: Development Checklist for Biking and Walking

# ***DEVELOPMENT CHECKLIST for BIKING and WALKING***

*Prepared by WALKSacramento and SABA (Sacramento Area Bicycle Advocates)  
September 2012*

This checklist is provided to give an indication of design, engineering, and policy elements that we consider when reviewing development projects.

## **POLICIES**

- Walking and biking is a priority
- Adopted a policy to develop a full multi-modal and ADA accessible transportation system

## ***Project Review and Comment***

## **POLICY CONSIDERATIONS**

- Pedestrian Master Plan
- Bicycle Master Plan
- Regional Blueprint
- Regional Blueprint Consistent General Plans
- Adopted Climate Action Plans
- Subdivision ordinances to support pedestrian and bicycle access and safety
- Zoning ordinance to support pedestrian and bicycle access and safety

## **ENGINEERING**

- SIDEWALKS & BIKELANES ON BOTH SIDES OF MAJOR ROADWAYS**
  - Pedestrian Level of Service “C” or better on arterials
  - Bicycle Level of Service “C” or better on arterials
- SAFE CROSSINGS FOR PEDESTRIANS**
  - every 300-600 feet on major arterials
  - well lit, marked crosswalks
  - audible signals & count-down signals
  - median refuge islands
- SPEED MANAGEMENT**
  - Speed limits based on safety of pedestrians and bicyclists
  - Implement “road diets” where there is excess lane capacity
- STREET DESIGN STANDARDS**
  - Maximize pedestrian and bicyclist safety
  - Sidewalks buffered by trees and landscaping on major arterials
  - Vertical curbs
  - 5’ minimum sidewalk widths, 8’ in front of schools
  - 6’ minimum bike lanes on busy streets

- ❑ **INTERSECTIONS**
  - Median refuge islands for pedestrians
  - Signal timing to enable safe passage
  - Signal detection for bicyclists
  - Crossings on all 4 legs of intersections
  
- ❑ **ELIMINATE BARRIERS**
  - Freeway, railroad, river and creek crossings
  - Obstructions in sidewalks and bike lanes

### **NEW DEVELOPMENT – REQUIRE**

- ❑ Walking & bicycling circulation plans for all new development
- ❑ Direct and convenient connections to activity centers, including schools, stores, parks, transit
- ❑ Mixed uses and other transit supporting uses within ¼ mile of light rail stations or bus stops with frequent service
- ❑ Minimum width streets
- ❑ Maximum block length of 400'
- ❑ 4-lane maximum for arterials; Recommend 2 lanes wherever possible

### **NEW DEVELOPMENT – DISCOURAGE**

- ❑ Cul-de-sacs (unless it includes bike/ped connections)
- ❑ Gated and/or walled communities
- ❑ Meandering sidewalks
- ❑ Inappropriate uses near transit (gas stations, drive-thru restaurants, mini storage and other auto dependent uses)

### **BUILDINGS – REQUIRE**

- ❑ Direct access for pedestrians from the street
- ❑ Attractive and convenient stairways
- ❑ Bicycle parking – long & short term
- ❑ Shower & clothing lockers

### **OLDER NEIGHBORHOODS**

- ❑ Improve street crossings
- ❑ Reduce speeds
- ❑ Provide new connections
- ❑ Create short cuts for walkers and bicyclists by purchase of properties or other means
- ❑ Provide sidewalks on both sides of major streets

## *Policy Review and Comment*

### **ENFORCEMENT & MAINTENANCE**

- ❑ Enforce speed limits
- ❑ Enforce crosswalk rules – conduct crosswalk sting operations
- ❑ Enforce restrictions against parking on sidewalks
- ❑ Enforce bicycle rules including riding with traffic, lights at night, stopping at red lights
- ❑ Implement CVC 267 setting speed limits based on pedestrian and bicyclist safety
- ❑ Sweep streets and fix hazards
- ❑ Repair and replace broken sidewalks

### **EDUCATION**

- ❑ Train staff on pedestrian and bicycle facility design.
- ❑ Train development community about pedestrian and bicycle planning and safety issues
- ❑ Bicycle skills training

### **FUNDING**

- ❑ Include pedestrian and bicycle facilities in capital improvement programs
- ❑ Include pedestrian and bicycle facilities as a part of roadway widening and improvement projects
- ❑ Support Measure A pedestrian and bicycle facility allocation
- ❑ Set priorities based on safety and latent demand
- ❑ SACOG Community Design grants & Bike/Ped grants
- ❑ California Bicycle transportation Account
- ❑ Safe Routes to School
