# Bridges to Smart Growth

Opening its Golden Gate, the New Partners for Smart Growth Conference returns to California in 2018. The city of San Francisco is 47 square miles of innovation – an incubator for technology, housing, transportation, public engagement and environmental and economic sustainability.

## The 2018 Conference Program

The program will span three days with pre- and post-conference mobile workshops. The main program will kick off on Thursday afternoon, February 1, with a plenary starting at 1:30 PM, and continue through Saturday morning, February 4, closing around lunch time.

The 2018 conference program will feature eight thematic tracks that will provide participants an opportunity for a deeper, more dynamic hands-on learning experience. Each track will be designed to create a peer cohort of practitioners that leave with new tools, strategies, models and templates to integrate into their work – with our signature multidisciplinary theme running throughout.

Also featured will be exciting mobile workshops focused on local/regional model projects. These workshops will be scheduled Thursday morning (Feb. 1) and Saturday afternoon (Feb. 3).

Thank you to our early conference sponsors!
